PROFESSIONAL SUMMARY

Final-year B.Tech CSE student with strong skills in Java, Object-Oriented Programming, and Data Structures & Algorithms. Hands-on experience building applications using Java and Flutter. Seeking entry-level Software Developer opportunities to apply clean coding, debugging, and problem-solving abilities.

TECHNICAL SKILLS

Programming Languages: Java, C, C++

Mobile App Development: Flutter (Dart)

Frontend: Flutter UI, HTML, CSS

Database: MySQL

Tools & IDEs: IntelliJ IDEA, Eclipse, VS Code, Android Studio

Core Concepts: Object-Oriented Programming, Data Structures and Algorithms

PROJECTS

Morse Code Converter (Java)

- Developed a Java application to convert text to Morse code and Morse code back to text.
- Implemented core OOP principles and efficient string-processing logic for accurate encoding and decoding.
- Built with a focus on simplicity and correctness to strengthen problem-solving and Java fundamentals.

Rental Hub App (Flutter)

- Built a Flutter rental application where users can browse and rent properties, flats, homes, furniture, electronics, and home items through category-wise tabs.
- Enabled owners to upload items with details, while customers can request or take items on rent within the app.
- Focused on professional UI design, smooth navigation, and better user experience for both owners and renters.

EDUCATION
